Indian Chemical Sector

India's chemical sector has been growing at average of 5-6 % for several years.

Its size is expected to reach US\$ 304 billion by 2025. The growth in Indian domestic market will be on back of increasing consumer spending and rapid urbanization which are fueling the end consumption demand for paints, textiles, adhesives and construction, which, in turn, leads to substantial growth opportunity for chemicals companies.

In this scenario, we bring this Chemical Directory 2025, which is an attempt to report on the chemical companies with their basic profile, current capacity, and expansion plans etc., along with details of address, tel, fax, email and details of key personnel.

The directory covers all chemical plants –all over India. It covers all segments viz. basic chemicals, specialty chemicals and knowledge chemicals.

Overview

Indian Chemical industry is the 3rd largest in Asia and the 6th largest in the world. It was growing at 5-6% over the last few years and expected to reach 8-9% growth in coming years. Domestic chemical industry is expected to reach USD 304 billion by 2025. Increasing urbanization are fueling the end consumption demand for paints, textiles, adhesives and construction, which, in turn, leads to substantial growth opportunity for chemicals companies. Further, the geo-political scenario of China is also pushing the global supply chain to expand away from China to India and South East Asia is also driving investment.

The Indian chemicals industry has a diversified manufacturing base and there is a substantial presence of downstream industries in all segments. Basic chemicals has over 50% share of total chemical production. Specialty chemicals and knowledge chemicals forms 20% and 30% respectively.

Indian Chemical Industry comprises both small and large-scale units, and presently, there are about 70,000 chemical manufacturing units located in the country (Deptt. Of Chemicals and Petrochemicals-Draft National Chemical Policy-December 2013) a major component (in numbers) are covered in the small scale sector.

Indian Chemical Sector

Government recognizes chemical industry as a key growth element of Indian economy. It allows 100% FDI in chemical sector with some reservation. Manufacture of most of chemical products is delicensed. Govt also encourages setting up of “Centres of Excellence” and “Industrial Clusters” by providing R&D incentives and area based incentives.

Despite the current pandemic situation, the Indian chemical industry is enjoying an optimistic scenario, with the supply chain disruption in China and trade conflict among the US, Europe and China. Anti-pollution measures in China is also creating opportunities for the Indian chemical industry in specific segments.

Ibis Chemical Directory 2025 – is one of the top sources of information available in Indian Chemical Sector. This directory provides every detail about the sector – it contains **profiles of** all leading chemical companies and their plants, their history, **acquisitions, co-generation, upcoming capacity, New projects, technology up gradation plans, plans, investments, details of captive power plants** etc.,

The directory contains key personnel details of **3,000+** Indian Chemical Plants along with their **direct email-ids, telephone numbers, mobile numbers** and **8,300+ contact details of all chemical plants in the country – with address, tel/fax/mobile/email etc.,**

How to Order?

Please visit <http://www.industry-focus.net/chemical-directory>

Add the product to Cart and Click on **Checkout**

The screenshot shows the Ibis website interface. At the top, there is a search bar with a magnifying glass icon and a shopping cart icon showing 0 items for ₹0. Below the search bar is a navigation menu with options: Home, Directories, States, Sector, Reports. The current page is 'Chemical Directory 2025'. The main content area features a large image of the 'Chemical Directory 2025' book. To the right of the image, the product name 'Chemical Directory 2025' is displayed, along with its product code and availability status. The price is listed as ₹8,950. Below the price, there is a quantity selector set to 1 and an 'Add to Cart' button. At the bottom of the product page, there is a section for reviews, currently showing 0 reviews. A small orange arrow points to the search bar.

and follow on-screen instructions
